CAREER SUMMARY

With over 3 years of experience in software engineering, I've contributed to building software for logging and disbursing transactions worth millions of naira, along with other financial solutions. When I am not building financial solutions, I help small-scale businesses boost their online presence by creating websites that increase customer trust and provide wonderful experiences.

SKILLS

Languages & Frameworks: JavaScript, TypeScript, React, Next.js, Angular, React Native, Ionic, TailwindCSS, Material UI, Angular Material, PrimeNG.

Tools & Platforms: Git, GitHub, Firebase, Content Management System (Sanity).

WORK EXPERIENCE

Frontend Developer, Princes Credit System Limited - November 2024 - Present - Ikeja, Lagos.

[Princes Credit Systems Limited](#) is a finance house with the goal to become the foremost consumer lending platform in West Africa.

- Collaborated with the engineering team to build features and maintain frontend interfaces for a loan application portal. Increasing the organization's disbursement amount from 1Billion naira to 9 Billion naira by December 2024.
- Developed the core loan management interface, helping admin users track processed loans, access critical loan details, and make data-driven decisions to improve lending operations.
- Developed interfaces that streamlined loan applications processes, eliminating manual verification bottlenecks and making the process faster and more efficient.
- Contributed to financial inclusion initiatives by increasing credit accessibility for Nigerian salaried workers

Frontend Developer, Neptune Software Group(UK, Uganda, Chennai, Nigeria) - June/2022 - October/2024 - Victoria Island, Lagos.

Neptune Software Group is a software organization that provides core banking applications to microfinance banks and financial institutions.

- Collaborated with the design and engineering team in the development of activity reporting software for financial institutions, Application automated report generation processes and optimized submissions to the Central Bank of Nigeria(CBN).
- Led a team of software engineers to develop and launch a financial mobile application on Google Play Store, This innovation led to an increase in banking activities by customers, resulting in increased revenue generation for the bank.
- Contributed to the development of an analysis dashboard for a loan providing organization, enabling admin users to make informed decisions and optimize business processes based on data driven strategies.
- Played a key role in developing a custom bulk messaging application for microfinance banks, incorporating personalized messaging, scheduled campaigns and CRM integration.

Truesoft Technologies - January/2022 - June/2022

A freelance agency building usable softwares and services

- Developed the analysis module used by administrative teams, significantly improving decision making and reducing manual reporting time through advanced data visualization and analytics
- Contributed to the development of key features in a marketplace application needing the update and retrieval of items at fast speed.
- Revamped the product catalog module, allowing administrative users to effortlessly add, create, approve, update, and delete items within the marketplace.
- Developed a user-friendly logistics module that simplified procurement and returns, now managing over 150 transactions per month, which directly contributed to improved supply chain efficiency and reduced manual errors.
- Engaged in daily stand-ups and sprint planning which kept both myself and the team accountable.

PROJECTS

Hackathon Winner(50+ Participants).

Luscious Chow is a food brand created with the sole aim of putting smiles on faces with good food.

- Led the design and development of a highly convertible landing page for a cloud-based food service provider, which contributed to increased user engagement and lead generation.

- Integrated a headless CMS, allowing the business owner to easily update content and make changes without developer assistance, providing long-term flexibility and control over the site.
- Collaborated closely with business owners in Requirements Gathering and Project Planning, ensuring the landing page met all business objectives and user needs.

AUTHOR'S PORTFOLIO

[Stephanie Odili](#) is an award-winning author best known for *Deafening Silence*, which won 2nd place at the 2019 Association of Nigerian Authors Prize for Fiction.

- Built a responsive author portfolio website using Next.js, Sanity.io, and Tailwind CSS, enabling seamless book updates and blog management.
- Implemented an automated newsletter feature using integrated email services, leading to a 15% increase in audience engagement and repeat visits
- Delivered a content management system (CMS) that simplified the client's ability to manage and update their site content autonomously.

EDUCATION

2021 **B.Sc. in Computer Science**, Covenant University.
